

Summer Term - Year 2 Curriculum

Maths

In maths, we will be focusing on capacity, fraction revision and application of our learning. We will be revising our four operations regularly and will be learning to apply their understanding in a variety of contexts.

Reading

As the children develop their skills in reading and learn all the sounds in the RWI programme, they will be moving from RWI groups into whole class reading where the focus will be on familiarising them with the skills they need to be fluent, confident and independent readers.

English

As authors, the children will focus on the application of key skills, including the use of accurate punctuation and the varied application of conjunctions, as they draft, edit, and write up their very own narrative and information pieces.

Science

As scientists this term, the children will be developing their knowledge on plants. They will learn about the life cycle of a plant and how this can be similar and different between flowering and non-flowering plants.

History

The children will be learning about and examining two powerful women of change: Rosa Parks & Emily Davison who were both iconic and influential people in their eras. We will be looking at how the world changed as a result of their actions and how we benefit from their key life events today.

Art

As artists, the children will be sculpting artwork based on objects that represent our culture. We will be exploring Lonnie Holley. There will also be the use of beach objects in their sculptures.

RE

As global citizens, we will build on some of the key ideas learnt last term as well as some key stories from the Gospels as we consider the big question, 'What is the good news Jesus brings?'

Computing

The children will be learning about making music and designing loops to play automatically as they explore the basics in programming.

RHE

We will be learning all about health and wellbeing. We will discuss the importance of good hygiene and how to wash our hands properly to prevent the spread of germs. We will also learn about the importance of moving our bodies and the positive impact this can have on our mental as well as physical wellbeing.

French

The children will be learning the names of ice cream flavours in French. They will learn the most common flavours and slowly build up to learning the names of more obscure fruity flavours.

PE

During PE, we will learn how to play striking and fielding games. This will be taught through the sport of rounders. The children will practise their throwing, catching and learn how to strike a ball effectively.
